

sP PR short

Cutting vegetables like a professional

The swizzzPROZZZ® sP20 is a real revolution for the preparation of natural and fresh food. It cuts any raw and cooked vegetable, ham or cooked meat, herbs, spices and any kind of fruit, easily without electrical power or any other fancy techniques, from coarse to very very fine.

To make soups, sauces or pizza fillings, spreads, purees or food for infants, the sP20 cuts any raw and cooked vegetable, ham or cooked meat, herbs, spices and any kind of fruit. There are no limits to ideas.

With the extra accessories more things like dry-spinning fresh herbs, whisking eggs or mixing light pastry can be accomplished. Using the lid, the container can be adapted for storage in the fridge or cooking in the microwave oven.

swizzzPROZZZ® is available through specialist shops. More information at www.swizzzprozzz.ch
